

**Amendments to the Specification:**

Please replace the paragraph beginning on page 27 line 8 with the following amended paragraph:

--As shown in Figure 13, the line member 132 extends downwardly from the pulley member 138 so as to be substantially coplanar with a main hub member slot wall 44. This keeps the line member 132 free from contact with a hub connector joint 52 which could bind and cause unnecessary wear on the line member 132. Also, as shown in Figure ~~[[12]]~~ 13, the line member 132 may be retained on a hook member 190 secured to the exteriorly exposed surface of the base portion 22 of the main hub member 18.--
